

## "fS=4" : Control and Security for 'DESFire'

### DEF-500

#### Product:

Set of elements, delivered as 'Kit', to be used in the **basic operational center** of those facilities that use RFID 'DESFire' tags when they contain a high performance "fS=4" structure.

The 'Kit' provides the necessary resources to ensure the **Control and Security** in the private definition and use of management keys. Thus, the **formatting** and **customization** of information is achieved in the RFID 'DESFire' tags endowed with "fS=4" structure, and in the operational Terminals of the site as well.

#### Elements included:

- Intended for security (DS9490R, DS1402D, TInCLA and TInACC).
- Utility programs **DELTA/1**, **DELTA/3** and **Q2\_UTIL**.
- Desktop reading-writing Terminal model **DEF-8311** (which connects to a USB serial port). It allows the administration of the RFID 'DESFire' tags endowed with "fS=4" structures in an easy but very secure manner, and not only for the utility programs **DELTA/1** and **DELTA/3** but also for the application programs.
